

Accelerate your workflow with digitized logistics processes

Stationary as well as mobile barcode and RFID readers can be used in a wide range of logistics applications to synchronize and optimize your processes. At the **LogiMAT in Stuttgart** we will show the range of numerous possible applications using our devices. Visit us in **hall 4, stand 57** - we'll be present there all the following products in the logistical environment in function.

We look forward to you!

LOCFIELD® UHF Antenna for individually tailored RFID reading zones

ID ANT.U LOCFIELD® Antenna can be easily shaped in any form that is needed and thus enables numerous applications.
