

FEIG at Jugend forscht

As a Sponsor for this year's regional competition Hessen Mitte of Jugend forscht (youth research) at Justus-Liebig-Universität in Gießen, we had the opportunity to observe young participants with their exciting and impressive projects.

With our presence and our stand we were able to show our FEIG world to the young talents.

Jugend forscht is one of the best-known youngsters competition in Germany and, as a nationwide competition, gives an opportunity for young talents to

Februar 2025

present their skills and ideas. In this way, young people can get excited about the fields of mathematics, computer science, natural sciences and technology. A perfect opportunity to find talents and encourage them in their passion.

Our prospects and products were within reach through our exhibits.

In addition to the participants' exciting projects, we were also able to introduce FEIG to the young researchers and get them excited about our products and prospects. As part of a special prize that the teams were able to win, we look forward to welcoming the winning team to our Headquarters in Weilburg soon to give them an insight into our technologies in line with our motto „Develop Experience“.

In addition to our great goodies, visitors and the researchers were also able to enjoy informational material about FEIG.

With the information given at our stand, we were able to give the visitors and researchers the opportunity to get a taste of FEIG and to get some information about internships, dual study programs and training opportunities. Our colleagues from HR and our development department gave a good insight into our exciting and diverse areas.

Februar 2025

We would like to thank all the visitors we had the pleasure of meeting and are already looking forward to the upcoming HR trade fairs.
